Gates**

That fit all your needs

INNOVATION

- Leading-edge technology to ensure safety and durability.
- Embedded computer technology to improve mechanical reliability and allow for many features to accommodate your specific needs for each different installation.
- Using latest technology motors to combine high-speed operation and maximum safety.

SIMPLICITY

- Highly simplified mechanical design, with a minimal number of moving components, designed to last.
- Modular design of electronic components, allowing quick and smooth troubleshooting and adjustment.
- Cabinet and internal designs allow easy access to all components for fast and trouble-free installation.

Speed

- SG-502 seconds Open – 2 seconds Close
- SG-2002 seconds Open – 2 seconds Close
- SG-4001 Second Open – 2 Seconds Close
- Long Arm Models3.5 seconds Open – 3.5 Seconds Close

Arm Variations

- All gates can be equipped with a round or flat arm (10 ft.)
- SG-200 and SG-400 have an option for an extra long octagonal shape arm (15 ft.)

Simple & Defect-free

- Fast: 2 seconds Up/Down
- Modular components
- Maintenance-free
- Large AC geared motor
- Highly Durable
- Simple and Compact

SG-50

Ergonomic & Reliable

- Fast: 2 seconds Up/Down
- Modular Components
- Maintenance-free
- Large AC geared motor
- Highly Durable
- Ergonomic Design

SG-200

High Performance

- High Speed Up: 1 second
- Careful Down: 2 seconds
- Built-in Extra-sensory safety
- Maintenance-free
- Brushless DC motor
- Battery option
- Smart Braking - No vibration

SG-400

Gates:

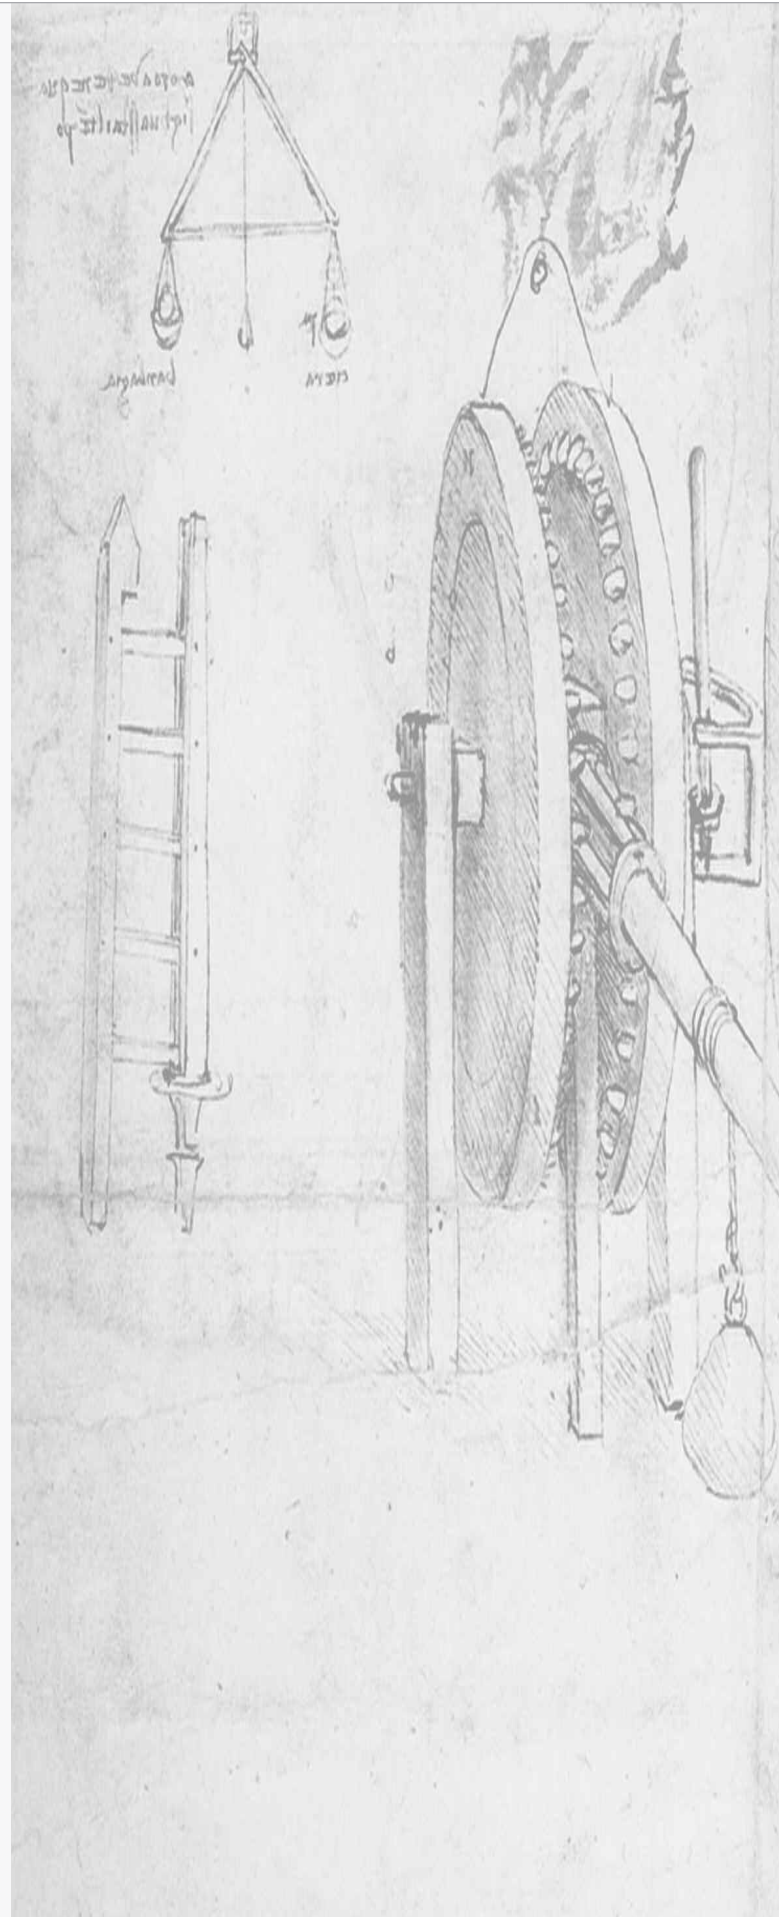

SG-50
SG-200
SG-200L
SG-400
SG-400L

Straight Arms:

SFB-3
SRB-3
HRB-3
S&B-45

Folding Arms:

SAB-M
SAB-H
